

LOCATION	DATE	COMPANY & REFERENCE	POSITION	DESCRIPTION
Sint Maarten	2023-	SGS Netherlands, Kirsten Blits	Procurement Expert 3	National Recovery and Resilience Plan: Project is implemented by the National Recovery Programme Bureau (NRPB), and is in response to the devastation wrought by Hurricanes Irma and. The scope includes procurement of civil and building works, including a new mental health hospital, solid waste collection and landfill management services, water supply improvement works, equipment for schools and other public institutions, and technical assistance consultancies for capacity building. All project components included necessary elements of improving climate resilience
Grenada	2022-23	The Nature Conservancy, Nealla Frederick	Site Engineer	Soubise Fisher Facility: A project to provide improved facilities and infrastructure for fishers in the village of Soubise on the East coast of Grenada. The project entails climate-smart, environmentally friendly land reclamation and coastal protection, construction of a jetty and boat haul-out, secure storage lockers for fishers, and a community promenade
Grenada	2022-23	Sissons Paint (Grenada) Ltd., Christopher De Allie	Site Engineer	Sissons Paint Building 5: As part of the reorganization of the production process, Sissons is constructing a new raw material warehouse with structural steel portal frame design. Services are limited to the post-contract stage and include preparation of project management plans, construction supervision, preparation of progress reports and payment certificates, and certification of project completion
Grenada	2021-22	Grenada Green Boatyard and Marina, Champie Evans	Engineer/Civil Works and Development Specialist	Environmental and Social Impact Assessment (ESIA): The assignment relates to a proposed boatyard and marina at Mt. Hartman Bay in southern St. George, Grenada. The project shall include construction of jetties and travel lift ramp, minimal reclamation and coastal reconfiguration, with preservation of mangrove buffer zone, yard preparation and construction of buildings and ancillary infrastructure
Grenada	2021-23	Grenville Commercial Complex Ltd., Darryl Brathwaite	Project Manager	3-storey Commercial Complex: A Public-Private-Partnership (PPP) project at Grenville in northeast Grenada. The complex will house the government's northeast Revenue Office and other institutional offices, and the Grenville branch of the Grenada Co-operative Bank Ltd. In addition, there shall be rental space for offices and food and beverage operations. The project is estimated to cost EC\$17.2 million (US\$6.37 million)
Grenada	2021	World Bank, Keren Charles	Technical Audit Consultant	Regional Disaster Vulnerability Reduction Project (RDVRP, Grenada): Conduct of an audit of nearly completed schools and other government institutional facility to determine effectiveness of the procurement process, efficiency of project execution with respect to cost and time for completion, acceptability of construction quality, and the compliance with climate adaptability, environmental and social management protocols , with the aim of learning lessons for the improvement of future project execution
Grenada	2021-23	IDA World Bank, Melanie Kappes/Keren Charles/Saurabh Dani	Project Engineer, Project Preparation and Senior In-Country Engineer, Project Implementation	Grenada Resilience Improvement Project (GRIP): The objectives of this project are to improve climate resilience of preselected public buildings and roads, increase capacity in emergency preparedness and response, and improve government capacity to plan and execute publicly funded projects. Specific activities under the consultancy are to design data collection templates, conduct site visits and collect all necessary data for conditional assessment, assist the project team with determination of eligibility of selected sites for inclusion under the project, prepare budget estimates, assist with document collection and collation in the preparation of the Project Appraisal Document
Grenada	2019-22	CIBC First Caribbean Bank Dean Paterson	Fund Monitor	Virgin Beach Apartments, True Blue: Property appraisal (cost, revenue and comparison methods) and development analysis (cost and programme analysis) for a 144-room luxury apartment complex and provision of Fund Monitoring services throughout construction. Reporting covers progress on site and expenditure, construction quality, materials procurement activity, risk mitigation and end-of-construction value projections
Grenada	2021	Grenada Chick Inn Farm Mr. Kayran Crosdale	Review Engineer	Grenada Chick Inn Farm Ltd.: Review of civil/structural engineering designs, ESIA report, and construction methodology for a medium-scale chicken farm and processing facility at Felix Park in the parish of St. David. The farm shall have a capacity to house 75,000 birds with processing line capacity of 1,000 b/hr. The review considered adherence to applicable design and building codes, compliance with Physical Planning requirements, climate adaptability and resilience, and mitigation of negative environmental and social impact risks

LOCATION	DATE	COMPANY & REFERENCE	POSITION	DESCRIPTION
British Virgin Islands	2019/20	Ministry of Finance Projects Unit/Recovery and Development Agency/CDB Drexel Glasgow (MoFPU)	Procurement Specialist	Reconstruction and Rehabilitation Loan – Hurricane Irma: Project involved procurement of civil works, including coastal defences, road rehabilitation and slope stabilization, building works and equipment for police and prison security, schools and other government institutions, and disaster management. All project components included necessary elements of improving climate resilience. Responsibilities extended to procurement training of central government and statutory body officers as well as local building and civil works Contractors
Dominica	2018/19	Dominica Water and Sewerage Company (DOWASCO)/CDB Sharon Griffith (CDB)	Project Coordinator	Climate Vulnerability Risk Assessment: Conduct of a CVRA of the water and wastewater sector in Dominica, the outputs from which were intended to inform the WSSDP (below)
Dominica	2017-19	Dominica Water and Sewerage Company (DOWASCO)/DFID/CDB Magnus Williams (DOWASCO)	Project Coordinator	Water Sector Strategic Development Plan (WSSDP): This project entailed the complete review of the water sector in Dominica from resource management to distribution, with the specific objective of developing a network that is robust, climate resilient, sustainable and appropriate for the Dominican circumstance. An initial consultancy was procured to give technical assistance with preparation of ToR's for engagement of consultants to prepare the WSSDP, which would include recommended interventions (capacity building, regulatory frameworks, and civil works) and cost estimates for the redesign of the water sector to create a more appropriate and resilient sector
Dominica	2015-19	Dominica Water and Sewerage Company (DOWASCO)/CDB/IDB Magnus Williams (DOWASCO)	Project Coordinator	Third Water Supply Project – WA-1 Network Upgrade: Funded by the Government of Dominica, Caribbean Development Bank and the Inter-American Development Bank, the project involves the upgrade to the largest water supply network in Dominica. It includes construction of new water storage tanks, expansion of the water treatment capacity, laying of new transmission pipelines, conduct or tariff review and a water audit to determine non-revenue water (both physical and commercial losses), and improving institutional and infrastructural climate resilience
Grenada	2014/5	Commercial Holdings, Conor Holmes	Project Monitor for Financier	250-boat boatyard, commercial buildings and ancillary structures: Review of project scope, designs and costing against applicable Codes and Guidelines, confirmation of expenditure for investor equity, supervision and certification of works, including backfilling and reclamation, environmental protection measures such as re-establishment of mangrove band, jetties, buildings, roads, storm drainage and underground services installations, review and approval of safety procedures and concrete and compaction testing, preparation of Client reports
Grenada	2013	Sandals Resorts International, Terence Des Vignes	Assistant Project Manager, Civil & Structural Design Engineer	225-room luxury resort development: Project management, including stakeholder liaison, scheduling and monitoring/reporting, Geotechnical investigation, design of storm drainage and earth retaining structures, structural design of buildings, supervision of works, including road realignment, storm drainage and underground services installations, review and approval of concrete and compaction testing. The project cost was US\$70.0 million
Grenada	2012/13	OECS Secretariat Social & Sustainable Development Department, Bentley Browne	Civil Engineer & Disaster Management Consultant	Climate Change Adaptation/Disaster Management Plan: Inspection and assessment of physical infrastructure, including buildings, roads, drainage, retaining structures, jetties and revetments, flood and hurricane damage risk assessments, and development of non-structural and hard engineering measures to improve community resilience to potential impacts of climate change for a coastal community in North coast Grenada
Grenada	2013	Grenada Electricity Services Ltd., Jusceno Jacobs	Civil Engineer & Hazard Risk Reduction Consultant	Environmental Red Flag Analysis: Evaluation of existing physical infrastructure and assessment of development requirements and construction-phase impacts, locational and vulnerability with a view to risk reduction related to proposed procurement and installation of solar PV generation panels for 14 candidate sites around Grenada
